CONSTRUCTION COST:

\$45,632,000

COMPLETION DATE:

2011

Hirani provided site supervision and coordination for the design and construction of a new, 79,270 sf free standing academic building on the southwest side of the existing campus center complex.

This new building replaces existing space in Buildings A, B, C and D in the Academic Village Complex which will ultimately be demolished. The demolition project component provides for protection and enclosure of utility connections currently in Building A that serve nine dormitory buildings at the perimeter of the Academic Village.
