

The Hirani Group is sincerely interested in the safety and welfare of our employees, the employees of our contractors and subcontractors, employees of our clients and the public.

While it will be the various Contractors' responsibility to provide their own Project Safety Program, it will be the Construction Manager's duty to see that the program is correct and adhered to. We have adopted an Injury Free Policy and adhere to it stringently. All our tradesmen are our most valuable assets and want all workers to get home to their families everyday injury free and over emphasize that their health and well being are our primary concern. Our personnel are well versed in OSHA's - Occupational Safety and Health Standards for the Construction Industry (29 CFR 1926). It is in the best interests of the Owner, the Contractors, and the workers that the project is always as safe an environment in which to work as possible. Our staff will oversee the entire Site Safety Process.

We place a strong emphasis on regular Site Safety Inspections, and meetings where deficiencies are investigated, and corrected in as short a time as possible. Any lost time due to Injuries incurred on one of Hirani's job sites is unacceptable.

Hirani Group's Program remains one of the most significantly successful in the New York area. (The national average EMR (Emergency Modular Rating which is the industry standard of measurement) is 1.00; Hirani is substantially below the national average.)
